TWO LOCATIONS

Our two Garden Centers are easy to reach. West of Boston, we are located on the Boston-Worcester Turnpike, Route 9, at the Natick-Framingham town line, directly opposite Shoppers World. South of Boston, we are located on Bedford Street, Route 18, 2 miles south of Route 128, at the Weymouth-Abington town line.

PRICES

The articles in the following list will be furnished at the annexed prices only when the quantity specified, of any given variety and size, is taken.

Specimens personally selected by the purchaser or his representative (or specially selected by us at his request) will be priced according to their individual values.

The prices are for the stock F.O.B. Framingham or No. Abington.

The prices are effective January 7, 1957.

TERMS

Our terms are cash. Charge accounts, for 30 days credit, may be opened upon receipt of satisfactory credit references—allowing us time for investigation. All accounts unpaid after due date will be subject to sight draft without further notice. C.O.D. express shipments will be made (with collection charges added to the bill) only when order is accompanied by a deposit of at least 25 per cent of the amount of the bill.

Our 66th Year

This is our 66th year in the nursery business. The years have witnessed a great many changes, particularly the last few. Our business has expanded from a retail and wholesale nursery to one covering the whole horticultural and garden industry.

In 1948 we built Wyman's Garden Center, the largest and most complete garden supply store in New England. It was our aim to make available to every home owner all types of garden plants and supplies and at the same time give better service to our customers.

In the fall of 1953, we acquired the finest garden center on the South Shore, Nursery-Land, on Route 18 at the Weymouth, Abington line. We operated this through 1955 as Wyman's Nursery-Land.

On March 1st, 1956, we combined both garden stores into one corporation, Wyman's Garden Centers, Inc. Now both stores operate under the same name.

Also on March 1st, 1956, our nurseries here in Framingham and in Onancock, Virginia were combined into one corporation, Wyman's Framingham Nurseries, Inc. We will devote our 135 acre nursery, north of Shoppers World on Route 30 in Framingham to the growing of plants for Wyman's Garden Centers, Inc. Our 129 acre nursery in Virginia propagates plants to be sent to Framingham for growing on for future sales. In addition, it will handle our wholesale nursery business, as we grow quantities of plants for other nurseries in eastern United States.

Our plans for the future provide for many improvements and additions in our facilities in order that we may serve you better. They will be completed as rapidly as possible.

TYPES OF EVERGREENS

To enable us to give accurate brief descriptions of Evergreens, we classify them into six types shown above.

A. Large, roughly conical, medium to coarse texture.
B. Narrow conical to columnar, medium to fine texture.
C. Broad conical, medium to fine texture.
D. Globose, including elliptical and flattened globe.
E. Spreading, bush-form, not prostrate.
F. Flat, prostrate or procumbent.

RATES OF GROWTH

These also vary, but we give an approximate average rate per year, also the key letters used in the code.

VR—very rapid—over 18 inches.
R—rapid—12 to 18 inches.
M—medium—8 to 12 inches.
S—slow—4 to 8 inches.
VS—very slow—under 4 inches.

TRANSLATION OF DESCRIPTIVE CODE

We condense the above information into code form as: B—M. Reference to the above explanation indicates that the tree described is a narrow cone or column, and grows from eight to twelve inches a year.

EVERGREEN TREES

Our evergreens have the quality necessary to provide excellent IMMEDIATE EFFECT — and heavy root masses to promote TRANSPLANTING SUCCESS.

We dig our Evergreens with a ball of the earth in which they are grown, and wrap them in burlap WITHOUT additional charge.

WYMAN'S POTTED ROSES FOR 1957

Our Selection of the best roses, based on our experience, and the 1957 American Rose Society ratings.

American Rose Society Rating:

10 is a perfect Rose.
From 9 to 10 are outstanding
From 8 to 8.9 are excellent
From 7 to 7.9 are good
From 6 to 6.9 are fair
From 5 to 5.9 are questionable
Below 5 are poor

All American Rose Selection Winners are designated by AARS.

HYBRID TEAS

Hybrid Tea Roses are the most popular class of all. For the most part they are low-growing shrubs which flower from late May until fall frosts. The shape of the flower is superior and the color range wider than in other types. The following list includes the best of the varieties as of 1957.

PERENNIALS AND ANNUALS

Because our supply of perennials and annuals varies greatly from month to month we do not list them in this catalog. However, we stock hundreds of the best varieties.

We sell all of our annuals and vegetables in plant-bands. This assures you of a well-rooted, stocky plant. The cost is a little more, but anyone who has had plants in bands realizes their value.

OUR PLEDGE

We will endeavor to handle only the highest quality merchandise and offer it to our customers at a fair and reasonable price.

We will represent our products as honestly as possible in our advertising and avoid misleading and exaggerated statements.

We are dedicated to having and maintaining the best horticultural establishment in the country. We will handle only items pertaining to gardening, outdoor living, and home beautification. We will not stray into other fields of business regardless of how alluring they may be.

OUR GUARANTEE

We guarantee our plants to be:

1. Grown with the greatest skill and science that our 65 years of experience have taught us.
2. True to name. Any plants that are not true to name will be replaced cheerfully, as soon as possible and at the proper season. In the event that nursery stock is not true to name, we will, under no circumstances be liable for more than the invoice value at the time of purchase. We give no other or further warranty, expressed or implied.
3. Alive and in good healthy growing condition when they leave our Garden Centers.
4. Free from disease. We spend a great deal of time, money and effort every year in the eradication of insects and plant diseases. Our nurseries are regularly inspected and certified by the Massachusetts Department of Agriculture.
5. Dug properly. This work is done under the supervision of trained experts.

If plants are not as represented on arrival, notify us at once.

Our responsibility ends when you receive the plants in good condition. We cannot be responsible for them after they leave the Garden Centers as we cannot control planting conditions, weather and after care. Plants are perishable living organisms. You can guarantee their success by giving them proper care. Treat them well.

FREE LANDSCAPE ADVISORY SERVICE

We are anxious to help you with your landscape problems, and suggest you take advantage of our free Landscape Advisory Service.

If you will come to one of our Garden Centers and bring a sketch of your property, giving dimensions, and photographs if possible, our landscape designers will lay out a planting plan "Planscape" for you. After agreeing on the design, you then have the advantage of seeing the plants recommended, and also selecting and tagging your own plants. In this way there can be no disappointment later on. We will then deliver them to you at no extra charge provided you live within 20 miles of either Garden Center.

Our experience with this method has resulted in more satisfied customers than the conventional method, where a salesman looks at your property, makes a plan and then returns to your home and sells from the plan. We have found that too few people know enough about types of plants and the quality to be able to buy them confidently without seeing the plants.

We have actual landscape plantings set up at our Garden Centers to help you visualize how your planting will look. There is a trained landscape designer on duty at all times who will be pleased to help you.
